Property infrastructure

The property's core engineering systems. The parameters for your format are checked with the Technical Director and the Architect.

The core engineering infrastructure and the basic preparation of the premises are already provided. The tenant's investment will be needed primarily to adapt the space to its own format.

Power supply	3 phases · 38 kW, documented Whether the capacity is enough is checked against the needs of the specific format.
Heating	Termoelectrica Central heating, radiators on both levels.
Air-conditioning · ground floor	Split systems
Air-conditioning · lower ground	A ducted air-conditioning system
Ventilation	Provided for in the technical infrastructure
Extraction	To the tenant's concept Extraction requirements are assessed for the specific commercial concept — with the Technical Director and the Architect. A restaurant, kitchen or production only after a technical review.
Water and drainage	Connected
Internet and low-voltage networks	Routes in place The tenant chooses the provider and the configuration.
Toilets	3 toilets
Utility room	A dedicated utility room for cleaning and cleaning equipment.
Lighting	Connection points for luminaires Prepared for fixture installation to the illumination level the future commercial concept requires.
Signage	An illuminated sign or light panel on the facade Possible under a separate approved design — with the Architect and the Technical Director.
Technical support	MEGAPARC's Technical Director and Architect We check the technical feasibility of the concept before commercial terms are agreed.

Invest in your business, not in preparing the premises.

The tenant's investment goes primarily into **adapting the premises to its own format**.

Already provided

- Base finished surfaces
- Engineering infrastructure
- Heating
- Ventilation and air-conditioning
- 3 toilets
- A dedicated utility room
- Stairs and entrances
- Lighting connection points
- A loading area
- A courtyard-side ramp

Adapted to your format

- Layout and zoning
- Retail or service equipment
- Furniture and interior
- Lighting and fixtures
- Extraction for the specific concept
- Equipment placement
- Signage and a light panel under a separate design project

First we check the technical feasibility of your concept — then we discuss commercial terms.

MEGAPARC's Technical Director and Architect review your concept before the lease is signed.

Two sides. Two flows.

Customers from the boulevard; goods and service from the courtyard. A diagram of directions, not to scale.

Moscova Boulevard

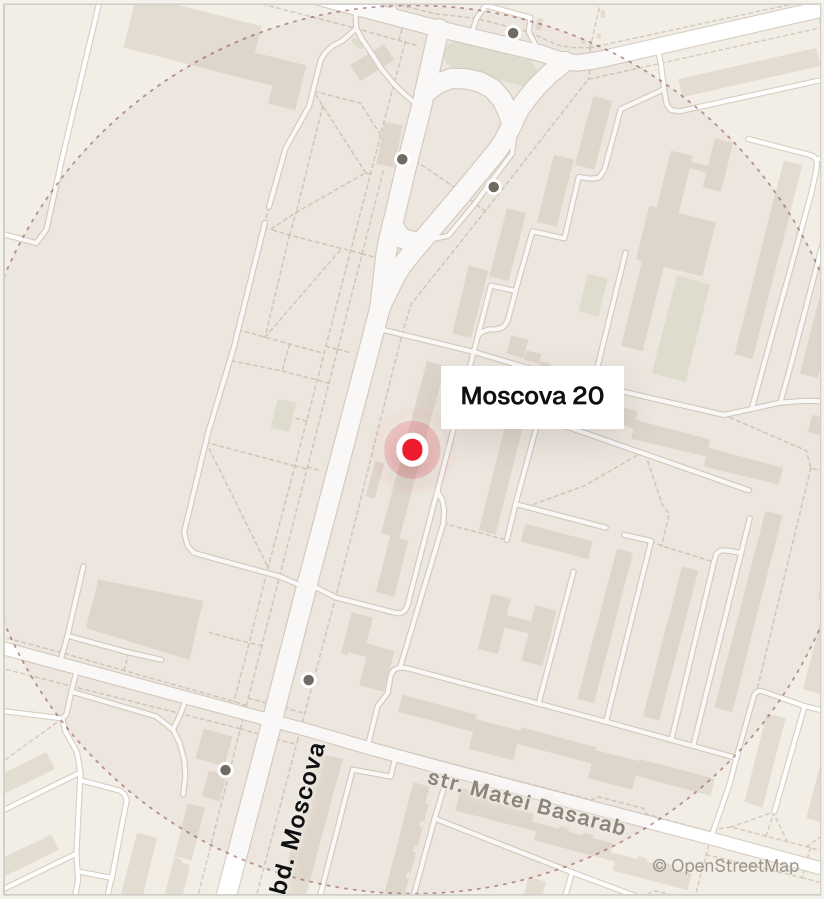

- direct customer entrance — steps and a ramp
- 2 exits
- goods delivery

Moscova 20 · ground + lower ground

Courtyard

- 1 exit
- a loading ramp
- goods delivery

4 Confirmed exits in total · including 2 to the boulevard and 1 to the courtyard
